PROFILE

A results-oriented Backend Developer specializing in the Laravel framework and PHP. Experienced in designing and developing scalable web applications and RESTful APIs, with a strong understanding of clean code principles and microservice architecture. Proven ability to collaborate in team environments using Git and a solid foundation in relational databases, particularly MySQL. Eager to apply extensive project-based experience to a challenging Laravel Developer role.

EDUCATION

UNIVERSITY OF JEMBER

Jember, East Java

Bachelor's degree, Information Technology, Last GPA 3,91

2021 - Present

Relevant Coursework: Database System, Algorithms and Programming, Web Programming, Object Oriented Programming, Application Programming Interface, Design Pattern.
